NotTodo App: Remember What Not to Do!

Introduction:

Hello! I've been thinking a lot about the things I don't want to do. Inspired by this, I came up with an idea: the NotTodo App. If you're tired of the endless TODO lists, this app is for you! It helps you remember what not to do. Let's dive into the details of this innovative project.

Main Features

User Management

01

- User Registration: New users can easily sign up.
- Login System: Secure login to access the app.
- Password Reset: Forgot your password? No problem!

Not To Do Management

02

- Add/Update/Remove: Manage your list of NotTODOS effortlessly.
- Contextual Display: See your NotTODOS by context like "At Home" or "At Work".

Scheduled "Not To Dos"

03

- Timely Reminders: Get notified 30 minutes before your scheduled NotTODO.
- Repeating Tasks: Set reminders to repeat daily, weekly, or monthly.
- Email Notifications: Get email reminders to keep you on track.

Sharing "Not To Dos"

04

- Share with Friends: Let others know what you're avoiding.
- Comments: Friends can comment on your NotTODOS.
- Unshare and Copy: Control your shared items and allow others to create their versions.

Technologies

**Backend**

Python & Django

**Database**

SQL/PostgreSQL

**Chat Integration**

Coze (ChatGPT)

**Frontend**

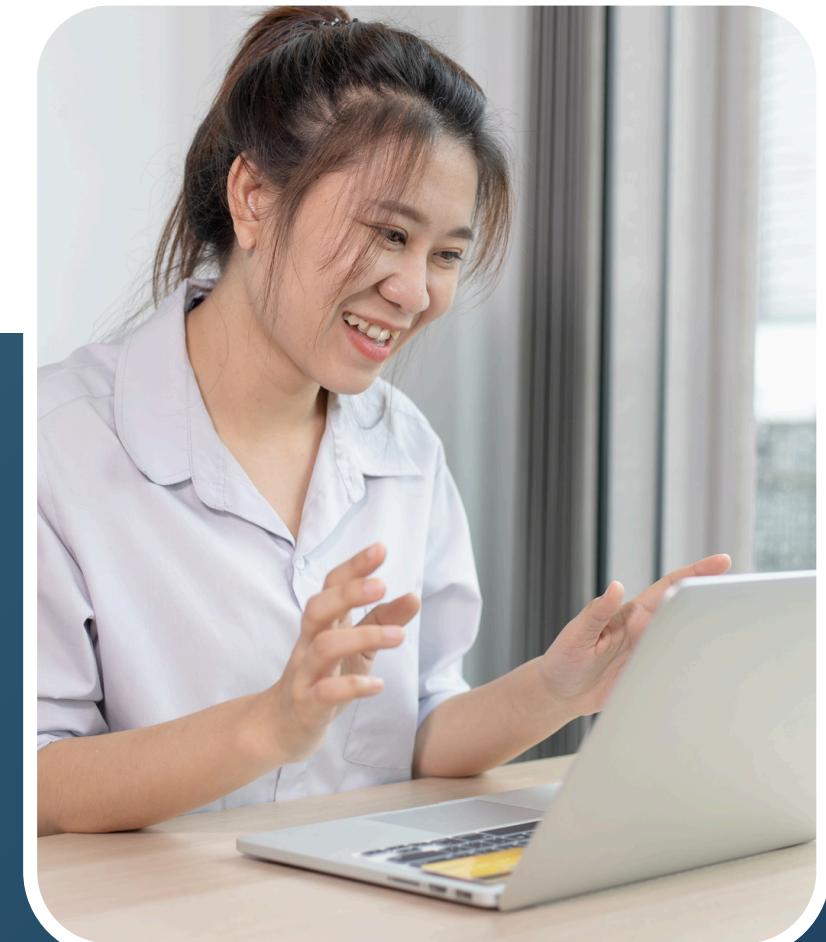

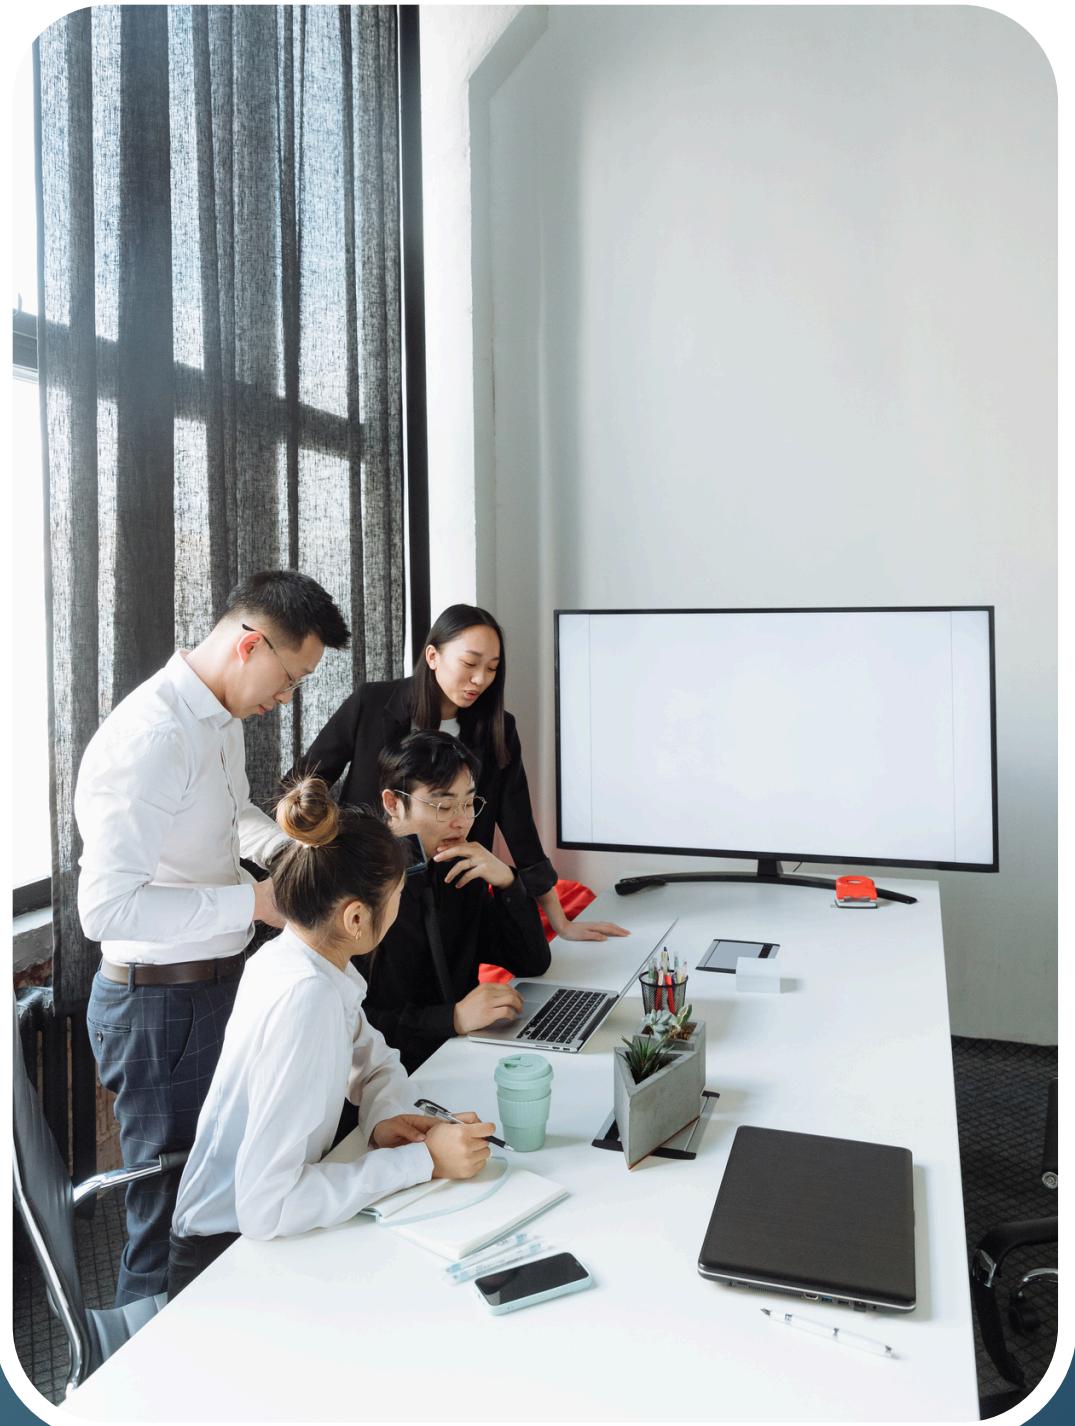

JavaScript & CSS, Bootstrap

**Task Queue**

Celery/Redis

**Deployment**

Heroku

Conclusion

The NotTodo app is here to help you keep track of what you don't want to do. Share it with friends, schedule reminders, and make your life easier by focusing on what truly matters. Thank you for your interest, and happy NotDoing!
